Sutherland—that the Treasurer report of Revenue and Expenditure as at August 31, 1951, be accepted. Cd.

Smale—that the Reeve and Treasurer be and are hereby authorized to borrow from the B. of M. the sum of \$25,000.00 deemed necessary to meet the third quarter requisitions for school and hospital purposes. Cd.

Smale—that the account from the Wainwright Municipal Hospital re Brian Galbraith, \$100.80 and Mrs. R. H. Robinson, \$181.00, be returned as not known and not responsible. Cd.

Administration and Taxation
Smale—that the report of the Treasurer reference to arrears of taxes Wainwright Refineries, that same had been paid, be accepted and correspondence from J. A. MacKenzie, K.C., Municipal Counsel, be received and filed. Cd.

Sutherland—that the report of Interim Audit conducted by W. Spear, Hamilton, Anderson and Co. August 22, 1951, be received and filed. Cd.

Archibald—that Motions 43, 44 and 45 of February 8, 1951, read bylaw 302A and not 302 as written and that the Secretary note the Minutes Book accordingly. Cd.

Sutherland—that the \$14.00 in the Sale Ledger re: N/4 1-43-1-4 and C. Sigurdson be cancelled. Cd.

Correspondence from the Alta. Ass'n. of MD's re Liability Insurance as to some form of Co-operative Insurance be carried and operated by the Ass'n., read and filed, this matter to be taken up at the Annual Convention.

Correspondence and Convention Credential Cards received from the Ass'n. advising the AAMD's Convention will be held in Calgary the 12th, 13th and 14th of Nov., 1951, this matter was tabled until October meeting.

Belanger—that the appointment of Miss Jeanne Archibald as Steno-Bookkeeper for the MD be approved as from August 10, 1951, and that the Oath of Office, Form B, be completed. Cd.

In the matter of Civil Defence, the Secretary advised that as the Town of Wainwright contemplated sending their Civil Defence Controller to the Training School at Olds for Course No. 2, Sept. 24, that no one from the MD had gone to Course No. 1, Sept. 4.

Archibald—that the Correspondence from the Dept. of Municipal Affairs August 22, 1951, re Land added to the MD of Wainwright No. 61 from the MD of Provost No. 52, be received and that this Council approve the addition as follows: Sections 13 to 17 incl., E/4 18, Sections 19 to 26 incl., in Twn. 41, Range 1, the NW and E/4 20, Sections 21 to 36 incl. in Township 41, Range 2, Sections 25 to 28 incl., NW 29, W/4 and NE 30, Sections 31 to 36 incl., Township 41, Range 3, NW 14, N/4 and SE 15, Sections 16 to 23 incl., W/4 24, Sections 25 to 36 incl., Township 41, Range 4, Sections 13, 24, 25 and 26, Township 41, Range 5, all West of the 4th Meridian. Cd.

Protection to Persons, Property
Belanger—that the matter of the Granary filled with grasshopper bait on the farm of P. G. Taylor be referred to C. Castle and report at October meeting. Cd.

Correspondence from the Farm Electric Service Ltd., as to the Wainwright Rural Electrification Ass'n. Ltd., that Whereas a petition has been received from resi-

dents of this Municipality in Townships 43, 44 and 45, in Rgs. 5, 6 and 7, West of the 4th Meridian, requesting the Council to approve of the construction of Power Transmission Lines for the Wainwright R.E.A.L. along the Highways, Streets, lanes, etc., in the said Township and Ranges, and further to consent to a Permissive Order being granted by the Board of Public Utility Commissioners of the Province of Alberta in order that the petitioners may be served with electric energy.

Now therefore, on Motion of C. Sutherland, be it resolved that this Council approve of the construction of power transmission lines along the highways, streets, lanes, etc., in the said townships and rgs. of this MD, and the installation of such works may be necessary to serve the Petitioners with electric energy, provided that such transmission lines, poles and works are constructed and operated in accordance with all requirements and regulations issued under the authority of the Dept. of Public Works and provided further that there be no liability what-so-ever on the part of the MD for the Ass'n's practice and methods in construction, maintaining and operating the said works.

Further on motion of C. Sutherland, BE IT RESOLVED that this Council do hereby consent to a Permissive Order being granted by the Board of Public Utility Commissioners Act of the Province of Alberta.

Belanger—that the Council of the Village of Chauvin be advised that a Roadway of 66 feet through SE 12, Township 43, Range 2, was surveyed during the month of August, 1951, at a cost of \$95.00, and that said roadway will be opened for the travelling public at an early date providing satisfactory arrangements for compensation can be made with the owner. Cd.

Archibald—that the report of C. Dallyn reference to the Ribstone Cemetery, that the MD of Wainwright No. 61 to hold the title in their name, that the \$100 issued to the Ribstone Community Ass'n. shall be for maintenance for and until 1964, and that the Ribstone Community Ass'n. shall be responsible for the upkeep of said Cemetery as provided in the agreement to be signed by the MD and the Ribstone Community Association be accepted. Cd.

Relief Grants and Health
Secretary reported that Mrs. Ruth Pepin had been placed into an approved home under the care of Mrs. Mary Bolster of 11313-127 St., Edmonton, as and from Sept. 10, 1951.

Castle—that the report of the Secretary re Mrs. Ruth Pepin be accepted. Cd.

Municipal Property
Belanger—that the offer of John Peterson to purchase the building on Lot 4, Block 2, Plan 1760 B.K., Hamlet of Ribstone for \$450.00, \$100 cash, balance October 15, '51, be accepted. Cd.

Smale—that Mr. Lorne M. Snow of Portland, Ore., be asked what improvement he intends to erect on Lots 15-20 incl., Block 9, Plan 1155 AE, Wainwright's Central Park.

Bylaw No. 335 concerning the sale of Lots 6 and 7, Block 9, Plan 1155 AE, Wainwright's Central Park, to Camille Massie of Fabian for \$30.00 cash presented.

It was moved and carried that bylaw No. 335 pass its first, second and third reading.

Bylaw No. 338 concerning the sale of Lots 8 and 9 and 10, Block 9, Plan 1155 AE, Wainwright's Central Park, to Harry T. French of Wainwright for \$45.00 cash presented.

It was moved and carried that bylaw No. 338 pass its first, second and third reading.

Bylaw No. 337 concerning the sale of Lots 11 and 12, Block 9, Plan 1155 AE, Wainwright's Central Park, to Jasper Firestone of Wainwright for \$30.00 cash presented.

It was moved and carried that bylaw No. 337 pass its first, second and third reading.

Bylaw No. 338 concerning the sale of Lots 1, 2 and 3, Block 9, (Continued on Back Page)

President, Doreen Simmermon.
Vice Pres., Billy Masson.
Sec.-Treas., Marjorie Coulman.
Girls Sports Director, Jean Larson.
Boys Sports Director, Arnold Enger.
Editor, Gauth Tomlinson.

Jarrow News

Mrs. Irene Mott of St. John's, N.B., is visiting at the home of Mr. and Mrs. Lingley. Mrs. Mott is a cousin of Mr. Lingley.

Mr. and Mrs. K. Sonoff and Elvina left for their home at Jasper on Wednesday after having spent several days with the C. Sonoffs.

Mr. and Mrs. E. Bruhaug, Mr. and Mrs. W. R. Meekins and Shirley Anne motored to Ryley on Sunday and visited with Olga.

The W.A. Bazaar turned out to be another red letter day and the members wish to express their thanks to all who helped to make it such a success.

Jim and Tony Sonoff and Louis Parent spent part of the week-end around town.

The Hutterites shipped out 215 lambs on Wednesday.

Card of Thanks

Our heartfelt thanks to all for their sympathy and for cards, floral tributes and gifts given in memory of our dear father. Special thanks to Rev. Inglis, Mrs. Long and the choir—Albert, Ethel and Jennie.

Post Office Boxes

Depending on the number of requests received there is a possibility that the Post Office Department will install more boxes in the lobby. If you would like a Post Office Box please have your name added to the list as soon as possible—the supply is limited.

I. C. Knudson, P.M.

Irma Old-Timer Passes Away

Mr. William Burton Whitbeck passed away in the Hardisty Hospital Saturday, September 22, at the age of 82 years and 12 days.

Mr. Whitbeck was born Sept. 10, 1869 at Douglas, Iowa. He was the third son of the late Arlow and Jennie Whitbeck. On March 8, 1905, he was united in marriage to Rachel Voshell. In 1908 he came to Loughheed and homesteaded north east of there. A year later his wife joined. They lived there until four years ago, moving then to Irma. Mrs. Whitbeck predeceased him a year ago. As a pioneer to this country, he has seen Canada blossom from a bud. He leaves to mourn his loss:

One son Albert of Loughheed; 2 daughters, Ethel of Vancouver and Jennie of Irma; 6 grandchildren; 2 brothers and 2 sisters in U.S.A.

Funeral services were held at the Irma United Church at 2:30 p.m. on September 24 with Rev. Inglis in charge. Interment was in Irma cemetery with MacLeod's Funeral Parlor in charge.

Floral tributes were from: Albert, Barbara, Jennie, Clarence, Catherine and Charles; Eric, Ethel and John; Ross and Ethel; Mr. and Mrs. R. McFarland; Mr. and Mrs. P. E. Jones and C. Jones and family; Mr. and Mrs. Frickleton; Irma W.L.T.; C. Clouston; C. Ingevaldson and P. Grove.

**Notice to Creditors
And Claimants**
IN THE MATTER OF THE ESTATE OF GORDON ROSS WHIDDEN, LATE OF THE DISTRICT OF JARROW, IN THE PROVINCE OF ALBERTA, FARMER, DECEASED.

Notice is hereby given that all persons having claims upon the estate of the above named, Gordon Ross Whidden, who died on or about the 12th day of June, 1951, are required to file with the undersigned by the 27th day of Oct. 1951, a full statement duly verified of their claims and of any relief of their claims and of any securities held by them and that after that date the administratrix will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been filed or which have been brought to her knowledge.

Dated this 14th day of September, 1951.
Sigurd Lefsrud, Solicitor for the Administratrix,
Viking, Alberta.

Weed Problem Discussed At Service Bd. Meeting

The Wainwright Agricultural Service Board met in the Council Room of the MD of Wainwright No. 61 on Friday, September 7, at 1:30 o'clock in the afternoon.

Messrs. Smale, Archibald, Bell, Folkins, Robblee and Maddex present.

The minutes of August 3, 1951, read and discussed.

Robblee—that the said minutes be adopted as read. Cd.

F. W. Maddex, the Field Supervisor, gave his report from August 3 to September 7, much of his time taken up with the weed inspectors and his opinion was that the weed situation at this time was not as bad as anticipated. Canada and Saw Thistle are under control but the road allowances are being neglected and several quarter sections as set out in the report need personal attention. The Toad Flax situation is getting worse and the supply of Sodium Chlorate is at a premium.

Note by Sec., A further 10 drums have since been received.

Leaky Spurge on 18-43-6-4 has been sprayed.

Folkins—that the report of the Field Supervisor be accepted. Cd.

Discussion for 1951 plan for Calhoun Vaccination for Bangs.

Bell—that the Field Supervisor adopt a Card System to demind all back owners of the 1951 Calhoun Vaccination policy. Cd.

Robblee—that the Board correspond with the Health of Animals Division, Govt. of Canada, for extra assistance in completing the TB test in this area. Cd.

Toad Flax control came under discussion.

Bell—that 100 drums of Sodium Chlorate be ordered for early 1952.

Archibald—that a test plot in Section 15-43-6-4 for re-grassing sandy lands be set up along the lines as presented by the District Agriculturalist and a complete record be kept of this. Cd.

In the matter of Coyote Control and training area officers, this was referred to the Field Supervisor.

Correspondence read from the Department of Agriculture as to regulations for the moving of Grain Screenings, also referred to the Field Supervisor.

No more business before the Board.

Bells—that the meeting adjourn until October 4, 1951.

John F. Reeves Laid to Rest

John Fox Reeves, the eldest son of Mr. and Mrs. George Reeves, was born in Whetstale, Kent, England, September 13, 1881.

For many years he worked as a baker and confectioner with his father before coming to Canada in 1905. The following year he took up a homestead 7 miles south of Mannville where his wife and family joined him. During his early years in Canada, he was with the construction crew which built the Ft. Sask bridge and later with the railway survey party at Heath and Headquarters Camp at Stony Plain.

Mr. Reeves who had seen some service in the old country as a lay-preacher in the Congregational Church and Seamen's Mission, found plenty of scope for such work in the surrounding districts here. For many years he conducted church services at Albert, Lefield, Underwood and Wilberforce, spending many long hours on the road with his horse.

During the latter part of his life he had very poor health and was confined to his bed. He bore his sufferings with great patience and fortitude, looking forward with unwavering faith to a better life with Christ "in that land where sin and sorrow, pain and sickness, never come."

On September 14, the day following his 90th birthday, he passed away peacefully in the Mannville hospital.

He leaves to mourn his loss, his loving wife, 2 sons, Charlie of Mannville, Jack of Kamloops, B.C.; three daughters, Mrs. W. J. Brickman of Edmonton; Mrs. C. L. Currie and Mrs. Harry Riley, both of Irma, also 2 brothers and sisters in England, 14 grandchildren and 8 great grandchildren. He was predeceased in 1915 by his eldest son, John F. Reeves.

His first wife the former Ellen Hoggan.

Funeral services were held in the United Church on Sept. 18, Rev. H. Penner officiating. The Misses Mix from the Gospel Hall sang the appropriate duet, "The Blessed 'Light of Home'". The hymns were: Forever With The Lord; Jerusalem, the Golden; And Abide With Me.

R. B. Hanning, Jas. Bennett, Geo. Clark, Harvey Robertson, Jas. Hill and Roy Hay acted as pall bearers.

Interment was made in the Mannville cemetery.

Floral tributes were from: The Family; Roses from his garden, Jessie; Elsie, Clay and Gary; Bennett family; Dorothy and Allan, Mary and Ross; Creighton, W.L.; Lefield Community; Mr. and Mrs. B. Hanning, Don, Gwen and Donna; Mr. and Mrs. Arl Wright; Mr. and Mrs. Walter Hinton; Mr. and Mrs. Mathers and family; Mr. and Mrs. R. Melnychuk; Mrs. G. Pulyk and boys.

To the Ponoka United Church: Mr. and Mrs. Walter Courser; Mr. and Mrs. Scott Courser.

To the Anglican Church Memorial Fund: Mr. A. J. W. Scott, Frank and Iva; Mr. and Mrs. Harvey Arnold; Mr. and Mrs. J. I. Jones; Mrs. Rutherford.

To the B.F.B.S.: Mr. and Mrs. Ivan Currie; Mr. H. H. Currie; Mrs. Ella McRoberts; Mr. and Mrs. Dick McRoberts; Mr. and Mrs. W. D. Ramsay; Mr. and Mrs. Robt. Lukens; Mr. and Mrs. J. Fleming; Mr. and Mrs. Archie Fleming; Mr. and Mrs. J. Clisdel; Mr. and Mrs. Wm. Matthews; Mr. and Mrs. L. Larson; Mr. and Mrs. Fred Humphrey; Mr. and Mrs. Jim Hills; Mr. and Mrs. D. H. Currie.

To the Gospel Tabernacle: Mr. and Mrs. Ernie Bauer.

To the Salvation Army: Buffalo Coulee W.L.I.; Mr. and Mrs. John B. Allen; Mrs. Chas. Stephenson; McQueen Memorial United Church; Mr. and Mrs. C. L. Currie; Mr. and Mrs. H. Hamilton, Shiela and Audrey; Mr. and Mrs. Geo. Clark and family; Mr. M. L. Ross; Mr. and Mrs. Neil MacKinnon; Mr. and Mrs. Fred Walling Jr.; Mr. and Mrs. Chas. Bauer; The Torrance family; Mr. and Mrs. Roy Hay and Arthur; Mrs. C. Johnson and family; Mrs. Nicoll and Faye; Mr. and Mrs. Joe Bauer; Leighton and Mary Bars; Vernon and Mildred Bjork; Mr. and Mrs. Percy Miller.

Easterly Echoes

The Battle River W.I. will meet at the home of Mrs. R. Dempsey on Thursday, October 4 when they plan to entertain the Strawberry Plains W.I. The main item of business will be the planning of their joint bazaar. The hostesses are Mrs. A. Bacon, Mrs. R. King assisted by Mrs. W. Peterson, Mrs. R. Dempsey and Mrs. W. Dootson with the draw to be donated by Mrs. W. Sanders.

Mrs. M. Enger attended an Executive meeting of the Alberta Conference W.A. at the home of Mrs. Thorne of Red Deer on Friday last. Mr. and Mrs. E. Fenton, Miss Edred Fenton and Mr. J. Tisdall motored to Stettler on Sunday.

Miss Elfrida Fenton attended the wedding of a former classmate in Edmonton on Friday.

Miss Joy Enger was a business visitor in Edmonton at the weekend.

France Could Use A Sherlock Holmes To Solve Mysteries

PARIS.—France could use a Sherlock Holmes to help solve three baffling mysteries which have brought violent death to 17 persons. Where did the grain come from that went into the bread in the little southern town of Pont-Saint-Esprit—bread that killed four persons and set at least 40 others writhing in the agonies of "St. Anthony's Fire"?

Did kindly, matronly Marie Besnard, 53, feed fatal doses of arsenic to her two husbands and 10 other persons, including close relatives, in-laws and friends? They all died between 1927 and 1947 and Madame Besnard—now in jail awaiting trial—acquired a great deal of wealth during that time, much of it in legacies.

Is it the body of Madame Marta Smigly-Rydz, widow of the late Polish army marshal Edward Smigly-Rydz, that was found under a bridge on the Riviera in July? If so—and police think it is, though the head, legs and arms are missing—who did it?

Case No. 1: Police figure they've got the bread deaths partly cleared up. The bread was poisoned by ergot, they say, a fungus disease that hits cereals in rainy spells and causes what was known from medieval times as "fer-

Improved Class-Rooms Help School Children

PALO ALTO, Calif. — Today's school children are believed to be growing up healthier and perhaps smarter.

Scientific advances in classroom construction indicate the old red schoolhouse may have been something of a menace.

The parents of today's generation of school pupils huddled and shivered in poorly heated rooms, under lighting conditions that gave them bad eyesight, and sat in seats that caused curvature of the spine and even stomach aches. A scientific laboratory in school construction just completed here at Stanford University is expected to produce ideas to improve all of those defects.

Educational leaders throughout the nation estimate that \$5,000,000,000 worth of new classrooms will be needed by 1956.

X-rays taken by the Stanford laboratory technicians proved old-fashioned seats impeded posture, digestion, health, and along with those, learning.

As a result, new types of desks and seats were designed to straighten backs and keep the youngsters alert and well.

Improved color systems for walls and chalk boards and better interior lighting were developed to provide even illumination in all parts of classrooms.

Prismatic glass block walls help diffuse outside light through the rooms.

With improvements in heating came a new problem—overheating. Tests disclosed that in the usual classroom with 30 students, enough heat was developed from body temperature to warm adequately a fire-room house when the outdoor temperature was 55 degrees.

The glass block walls help insulate rooms. Controlled heating by thermostats, which release warm air automatically through roof vents, keeps the rooms at a comfortable temperature.

Woman Finds Stolen Son

Kidnapped 47 Years Ago As An Infant In Argentina

PROVIDENCE, R.I.—A Providence woman said recently that the infant son who was stolen from her arms in Syria 47 years ago has been found in Argentina where he is a prosperous bakery owner.

Mrs. Ida Bechara, 64, said she hoped to have a reunion soon with Jorge Azar of Mendoza, Argentina, the man she believes to be her son. She said she had been in touch with him by mail.

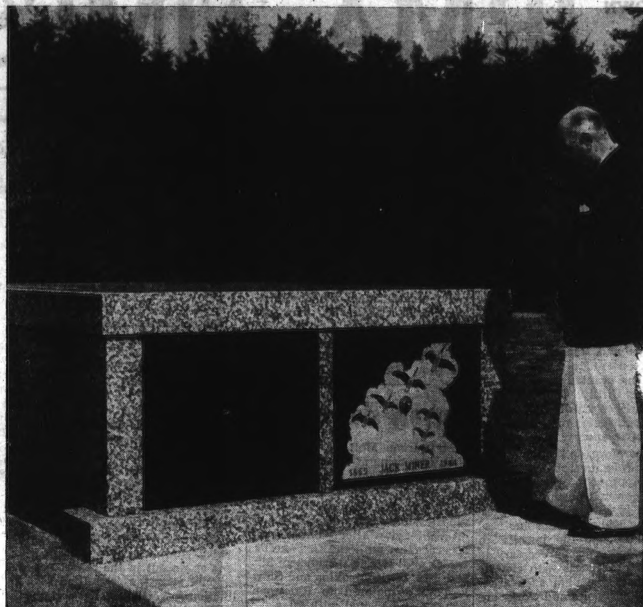

She said Azar wrote her that his kidnapper, whom he called his "aunt" confessed the abduction on her death bed and told him he had a mother named Ida living in the United States.

After learning the story of his origin, Mrs. Bechara said, her son made inquiries through Syrian newspapers and churches in this country. She said a man who became interested in his quest found her here July 4 and put her in touch with her son. She said her son's father died many years ago and she since has remarried.

Mrs. Bechara said that in 1904 she was aboard a ship of Beirut, Syria, about to depart for the United States. A woman took her three-month-old son from her arms to admire, she said, and then vanished with the child. She said she delayed leaving to look for the baby but gave up hope after a while and came to this country.

It is 3,900 air miles between the Azores and Baghdad.

Memorial To A Great Naturalist

Many F. Miner stands by the tomb of his late father, Jack Miner, Canadian Naturalist. Before Jack Miner died he expressed a wish that his body be placed in a little secluded spot on his world famous bird sanctuary at Kingsville, Ontario.

Before Jack Miner died he created what he called his little memorial park of about an acre in size. Around the outside of the small area are planted Norway Spruce which act as a wind break and where the English ring-necked pheasants roost. Inside of the spruce is planted a row of hawthornes where the cardinals, catbirds and other song and insectivorous birds nest and sing their songs

of praise. The next row of shrubs are white lilacs which give beauty and fragrance to the setting, then comes the half acre of green, green grass with the above sashpopen in the centre made possible by the kind co-operation of Mr. David Miller of Miller Monuments of Elkhart, Indiana, which was carved out of Minnesota granite.

Birds Guard The Tomb

The tombs of some famous men are guarded by soldiers, but Jack Miner's body, who loved birds and gave his all for birds, is much different because the beautiful cardinals guard him from daylight until dark and the whippoorwill's voice can be heard at night with the toads and frogs in the nearby ponds acting as a quartette in the distance.

Each winter several hundred Canada Geese, which Jack Miner helped save from extinction, spend the winter at the Jack Miner Sanctuary and one stormy day they were missed from the ponds and the most touching sight to ever be seen on the Jack Miner Sanctuary was to find a thousand geese had alighted in this little area surrounding Jack Miner's tomb and seemed to be mourning the loss of their friend because not a sound could be heard from them.

Think Right—Eat Right—Live Right

Accent Is On Accessories

Interesting hutton arrangement, (left), accents Ben Rieg's British wool dress with its easy side-wrapped skirt. A crisp white collar and dark belt are worn with it. Black accessories complement this neat pin-dot tweed suit, (center), which is destined for popularity. Black braids edge the

pockets and jacket of which collar and buttons are black. This sheer gold wool dress, (right), will be a favorite with the career girl, because of its shimmering lines. Like many other ensembles this fall, it, too, has ebony accessories—black stitching and patent leather belt which highlight dress.

High Spires In Rockies Conquered

Swiss-Born Climbers Succeeded In Topping All But One Spire Of The "Seven Sisters"

COLEMAN, Alta.—All but one of the "Seven Sisters", in the foothills of the Canadian Rockies, now have been climbed.

The Sisters, bare and jagged rock spires averaging 750 feet, were tackled by two Swiss-born mountaineers, Bruno Engler and Fritz Frey.

Before their attack, only "The Placid One" had been climbed. It took them three weekends to defeat five more.

Their most difficult climb was the main spire, "The Old Sister".

Engler, an Alberta government photographer, said they had to inch their way up the last 120 feet using hand holds only.

"I almost didn't make it—but I had to hang on and continue," said. The descent was made with the help of rappels, rope-offs, and the climbers swinging through the air in 80-foot leaps.

During their leaps, the ropes were attached to pitons driven into crevices in the rock.

Near the bottom of the spire, the climbers had to make a blind rope-off to reach the ground.

"We took a pot-luck chance and it paid off," Engler said. "At the end of the last rope-off, there I was, just two feet from the ground."

They said they plan to come back to climb the only spire that they couldn't manage this time. It's No. 2—"The Witch"—with barren perpendicular sides and a bleak overhang.

Colors In Fall Fashion

Grays Appear Top Choice In Autumn Clothes

The grays emerge as the top color choice in clothes for fall. In all its shades and textures gray is the color that can take accessory colors as no other shade because it is so neutral.

Your face looking out from between a gray hat and a gray coat needs color and a dramatic application of your makeup to keep it looking bright. Most of us lack enough color in faces to achieve this naturally. We need more brilliant, exciting makeup to offset the drab properties of this neutral color.

When it comes to accessories for your gray costume consider the following color possibilities: All the blues including peacock and turquoise, pink, garnet, coral and orange and gold along with green, brown, rust and, of course, black and white.

If you select one of the reds you want to color-match your lipstick, nail enamel and rouge. Your powder, too, should be selected to be individually becoming, keeping in mind, however, that it should be warm enough, and golden enough, to offset the neutral gray. For eyeshadow choose the more brilliant greens or blues rather than the somber browns, grays or blues.

Greige, (gray-beige), is a related color that is becoming to many women. What is true of gray is true of greige in most respects. Remember though, that greige has more warmth and can, therefore, be worn with paler make-up.

Deep, rich brown ranks close to gray in importance this season. Since the whole brown family has been in the fashion background for several seasons, make-up colors to go with brown probably are absent from your current dressing table collection, with the exception of coral.

Accessory choices for this color might be beige, coral, all of the reds, purple, violet and pink, white and black, green, copper and gold. Again, if you select a red accessory color, stick to it for your nails and lips. Face powder should be beige or a light neutral shade while your rouge can be a bright pink or one with a coral tone. Eyeshadow: Peacock, blue, violet or brown.

With all the many tones in coats, suits and dresses this fall the whole violet family gains importance. If you select this color in your clothes it is assumed that you wear it well.

Romance Succeeds After 59 Years

AXMINSTER, Devon, England.

A 59-year-old love story had a happy ending with the wedding of William Arnold, 50, and Elizabeth Drew, 56. William was a soldier of 21 when he first asked Elizabeth to marry him.

"I'm too old for you at 27. Go away and try to forget," Elizabeth told him.

William married, travelled the world and became the father of nine children. Then his wife died. Last year he and Elizabeth met again. This time she said yes.

OUR COMPLETE SHORT STORY

DESERT MADNESS

The Marvelous Effect
Of Rain Drops.

By May Hall Thompson

I DIDN'T really want to murder Jack Canfield, but I knew I had to. My friend was now sick with desert madness, and was plotting to kill me. I had to get him first. I had to have water before I could act. My mouth felt prickled with a thousand needles.

As I picked up the tin cup it rattled against the sand, and Jack, lying under the tent canopy, muttered, "You stay out of the water, sneak thief. You know it's rationed."

He eyed me like a snake watching his prey. Jack was crazy and was waiting to kill me. I had noticed it first a week ago. On that day he had said to me, "Let's get out of this hole now. If there's gold here we haven't changed. Supplies and water low. Heat growing worse. Vitality almost gone." His words had an undertone of meaning. At that moment suspicion struck me.

"Let me have the map then," I answered sullenly. "And I'll stay. I've spent money on this venture and I want something out of it."

"I'll not give you the map," declared Jack. "We came here together and we'll go out together."

"Double-crosser!" I yelled at him. "So you've found it! You know where the pay streak is?" Suddenly I brought quick distrust and hate. "Now you want to get rid of me and come back later. But you'll tell me where you found it or—"

"Good," he retorted as he gazed at me long and speculatively. That gaze made me forget my anger and become wary instead. Jack had a strange look in his eyes. "You're locoed," Jack went on. "And I'll be the same way if I stay here much longer. If you weren't crazy you'd know I haven't the gold. And why should I give the map to you? It's mine, willed to me by my grandfather. We can come back again when the heat has passed."

Anger made my hot blood boil. It was my money that had financed the trip to this wild, forsaken desert spot where a rich deposit of gold was supposed to be located. We had started late in spring, Jack and I had packed horses, with provisions to last several months. Though we carried water with us, we finally camped by a waterhole which we found near the location on the map. At first, it was a grand adventure. I remember how good the food had tasted cooked over a campfire; how fresh and eager we were ourselves as we hunted for the deposit. But we had not found the gold. Then had come the heat, growing worse each day, drying up the waterhole,

and sapping our strength until we now lived in a perpetual inferno.

At the moment the agony of all this frustration caused a quick spurt of energy to flow through my body. Dropping the cup of water, I lunged at him, taking him unaware. One blow struck his head into the sand. Having taken him without warning, he was no match for me. Methodically I began choking the breath out of him.

But as quickly as I had clutched his throat I loosened my hold. I straightened up to get a better glimpse of the scene which had for one second darted before my line of vision. I had seen water. Yes, to the north was a lake of turquoise blue. Cool waves lapped the shore, a water lily idled overhead. And my only desire then was to throw my scorching and burning body into those waters. I started running, forgetting the vanishing picture only the fact of booting liquor. Pina Hoffman, I started back. With determination then I made up my mind nothing would prevent my killing the man who had brought this upon me. I would sink into camp and get Jack unaware. As I staggered across the shifting sands, I prodded my tired body with the pleasing thought of getting it. The sun dimmed as I stumbled along and finally disappeared behind a cloud. Darkness spread over the sky and earth. Then I saw lightning fork the heavens and heard thunder crash.

The smell of rain reached me before the rain itself. The fresh odor overwhelmed my senses. Suddenly nothing mattered but the rain. Then it came, first in heavy drops then faster and faster. And where red devils had danced there were now only horizontal sheets of water. I stood still while the rain flowed over me like a shower bath. I held back my head and let it wash down my parched throat. As my dehydrated and racked body absorbed the healing moisture, I felt my strength return.

I heard Jack calling to me. His voice shocked me, not only because of the desperation in it but because, in spite of that, it had a natural ring to it. It sounded exactly like the voice of my college friend, a friend whose comradeship I had valued more than any other's. And suddenly I knew Jack was normal again. Desert madness had left him with the coming of the rain. I no longer had to kill him.

A simplified "on the spot" rating system was brought into service at the time of the rate adjustments. Agents throughout Manitoba, Saskatchewan and Alberta have been advised of the rate changes.

Mr. Hook, Western Canada Insurance Underwriters' association president, said changing business methods, new processes, and materials have effected rural business fire hazards. Under former rates, he said, some risks were no longer paying a fair share and other risks were overpaying.

FESTIVE—quick to fix!
with Modern Fast-Acting DRY Yeast!

FAN TANS

Measure into large bowl, $\frac{1}{4}$ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle slowly with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 min. THEN stir well. Scald 1 c. milk and stir in 5 lbs. granulated sugar, 2 tsp. salt; cool to lukewarm. Add to yeast mixture and stir in $\frac{1}{2}$ cup lukewarm water. Beat in 3 c. once-sifted bread flour; beat in 4 lbs. melted shortening. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from drafts. Let rise until doubled in bulk. Punch down dough in bowl, grease top and let rise again until nearly doubled. Punch down dough and roll out, half at a time, into a rectangle a scant $\frac{1}{4}$ " thick; lift dough, cover with cloth and let rest 5 min. Brush with melted butter or shortening; cut into strips $\frac{1}{4}$ " wide. Tie 7 strips together; cut into 10" pieces. Place 2 pieces of each mufin pan; separate slices a little at top. Cover and let rise until doubled in bulk. Bake in hot oven, 400°, 15-20 min.

FLIECHMANN'S
FAST RISING
DRY YEAST
ACTS FAST!
STAYS FRESH!

• Always running short of yeast because it spoils so quickly? End this nuisance — switch to modern Fleischmann's Fast DRY Yeast! Keeps full strength and fast-acting right in your cupboard — no refrigeration! No new recipes — one package equals one cake perishable yeast in any recipe.

Get a month's supply!

PRAIRIE MEN GRADUATE

Five prairie men were among the thirty successful candidates who received their diplomas during graduation ceremonies for the R.C.A.F.'s third peacetime Service Police course held at Rockcliffe, recently. Here, Corporal S. H. A. Joseph, of Kesteven, Sask., receives congratulations from Group Captain R. S. Turnbull, Director of Reserve and Manning at Air Force Headquarters, Ottawa, who presented the diplomas. Others, left to right are: Corporal A. A. Bittner, of Camrose, Alta.; Aircraftman D. G. Smith, of Nipawin, Sask.; Aircraftman W. E. Schaffner, of Swift Current, Sask., and Leading Aircraftman F. Neufeld, of Rosetown, Sask.

Western Briefs

Boolegging At 86

VICTORIA, B.C. — An 86-year-old woman pleaded guilty in police court in neighboring Saanich to a charge of bootlegging liquor. Pina Hoffman was fined \$300. Police said they found nine cases of beer and five bottles of liquor on her premises.

To Coach Penitence Squad

PENTICTON, B.C. — Bill Carse was named coach of Penitence's senior Okanagan Hockey league team. Carse, former playing coach of Vancouver Canucks of the Pacific Coast league, is expected here Oct. 5.

Rural Fire Rates Discussed

EDMONTON. — Rate reductions more than outweigh increases under a revision of "board" rural fire insurance rates in the prairie provinces, Leonard Hook of Winnipeg, said. Mr. Hook, Western Canada Insurance Underwriters' association president, said changing business methods, new processes, and materials have effected rural business fire hazards. Under former rates, he said, some risks were no longer paying a fair share and other risks were overpaying.

A simplified "on the spot" rating system was brought into service at the time of the rate adjustments. Agents throughout Manitoba, Saskatchewan and Alberta have been advised of the rate changes.

Gertrude And Sheila Have A Trailer!

SASKATOON. — Gertrude and Sheila have a trailer.

Sheila built it and Gertrude pulls it—but that isn't really hard on Gertrude because Gertrude is a car, a 1930 Chevrolet with a 1939 Essex body and "a bit of Ford here and there."

Gertrude and Sheila Purvis are fast friends. For although Gertrude is getting on in years, she has carried Miss Purvis and pulled the trailer about 25,000 miles and never let me down once," says her owner proudly.

Miss Purvis, a school-teacher of Lethbridge, Alta., built the trailer herself. She scored custom-built parts and ready-made blueprints and designed her own.

On wheels and axle from an old car, she built a six-by-eight foot aluminum-covered cabin furnished with a bed, cupboard, sink, clothes closet and chest of drawers.

This fall Miss Purvis will teach at Grangview School, north of Lethbridge and two miles from the Alberta-Saskatchewan border.

2961

THE TILLERS

Horse Meat For Weyburn

WEYBURN, Sask. — Some housewives, no doubt, will be happy to learn that those cheaper cuts of meat will soon be available in Weyburn. It was learned here that horsemeat will go on sale, as a new store to be known as "Weyburn Horsemeat Market" will be opened.

Captured Proficiency Trophy

TORONTO. — Sea cadets at Winnipeg, competing against more than 80 sea cadet corps from British Columbia to Newfoundland, have captured the general proficiency trophy presented annually by the Navy League of Canada.

Refinery Opens

EDMONTON. — The \$8,000,000 McCall-Frontenac Oil Co.'s East Edmonton refinery is expected to be in production about Oct. 1, officials said. When completed, the refinery will handle a capacity of 5,500 barrels of Redwater crude oil daily.

Government Men Elected

WINNIPEG. — George D. Iliffe of Winnipeg was named president of the Institute of Public Administration of Canada. He succeeds George F. Davidson of Ottawa, deputy minister of national welfare. Vice-president for Saskatchewan is T. H. McLeod, deputy provincial treasurer.

Fly Spraying

LETHBRIDGE. — Lethbridge's second fall fly control program got underway when the city's experimental spraying unit covered the brewery sections of the downtown area. The fall fly control program is an aid to the elimination of next year's flies.

Winner Of Scroll

GIMLI, Man. — All was "spit and polish" at Gimli air station recently as the initial school of 42 graduated with "wings" after 40 weeks of stiff training in the air and on the ground. Proud graduate was P. O. F. E. Wagner of Kelvington, Sask., who won the R.C.A.F. scroll of honor for general proficiency.

Record Cattle Sale

SWIFT CURRENT, Sask. — Burns and Co. did a record day's business in Swift Current, when they dealt with Minor and Sons, ranchers of Abbey, Sask. The Minors brought in 361 head of cattle and realized a total of \$113,850.51, the biggest sum ever paid to any one customer in a lump sum in a Frontier City stock yard.

Today is yesterday's pupil.

FALSE TEETH

That Loosen
Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plates dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little FASTERTH, the alkaline (non-acid) powder on your plates. Holds false teeth in place firmly so they feel comfortable. Does not sour, checks "false" odor (denture breath). Get FASTERTH at any drug store.

Prairie Farmers May Soon See Houses Built of Straw

Manufacture Of Wallboard And Other Building Material Already In Use With Plans Of Expansion In Process

(By Dave Innes, Editor, The Saskatchewan Farmer)

The prairie farmer—and his city neighbor, too, for that matter—may build his house of the straw taken from his own fields in the not too distant future. The entire house won't be built of straw, of course, but the inside walls may be finished with boards made from straw and perhaps strawboard may replace shiplog for the outside sheathing too.

Use of straw to make wallboard, just as wood pulp and other materials are now used to make wallboards of other types, may not become widespread on the prairies in the immediate future, but it won't be long before the new product is on the western market.

A Swedish company, Stramit Corporation, with headquarters in Stockholm, already has completed plans for a plant at Innisfail, about 70 miles north of Calgary. The company plans to put in three machines, to manufacture the board, the first by October, shipping the machines from Sweden.

If the new building board finds a large enough market, the Swedish company may erect plants at other points on the prairies.

Manufacture of wallboard and building material from straw isn't new to the west. It has been tried before.

In fact several houses and other buildings made of straw blocks are still standing at points around Regina.

In the early thirties machinery turned out strawboard and straw blocks on the farm of T. A. McCusker, a prominent farmer just north of Regina on No. 6 highway. The straw blocks, used like concrete or concrete blocks are used for the walls themselves, were made by a machine something like a hay baler. Only the machine compressed the straw much tighter than a hay baler does and into smaller blocks for ease in handling.

The McCuskers added a straw block addition of several rooms to their home and it is still in as good condition as the rest of the house today. It was sheetrocked on the outside and plaster-finished on the inside.

"The blocks were a foot thick," Mrs. McCusker recalls.

"I like that part of the house best," Mrs. McCusker adds. "It's cool in summer and warm in winter."

One of the largest cottages at Regina Beach was built entirely of the straw blocks as was a two-story house near Lebert, in the Qu'Appelle valley. And both appear to be in good condition.

A poultry house on the outskirts of Regina was built of the strawboard and the boards were also used to line studies of radio station CKCK on the third floor. The Lebert-Ford building before they were moved to their present location on the first floor. The strawboard was used in the studios for sound insulation and rather than being finished off with a plaster coating were covered by heavy drapes.

In a demonstration at the Regina exhibition during that period a blowtorch was used on a small building made of strawboard to show just how fire-resistant it was. Builders appeared skeptical of new products in those days, however, and there wasn't a large enough market for the straw products.

Since then there have been many changes in the building industry and the use of building boards of one kind or another is the accepted thing.

They have much to recommend them for not only do they boast insulating properties but they can be applied by the unskilled home-builder himself, in large sheets which speed the job of finishing off rooms in a house.

Decision of the Swedish company to open a plant in Alberta brings the strawboard back into the picture. If the board finds a ready market and other plants are set up, it will mean the establishment of still another secondary industry using the product of western farmers.

The National Research Council at Saskatoon has done considerable research on the subject and according to E. Stone, research chemist of the council, who spoke at a meeting at Okotoks, in Alberta, the pulp and paper people too are interested in

Manitoba Will Implement Pension Plan

WINNIPEG. — Premier Douglas Campbell said Manitoba will implement a federal old-age pension plan for persons within the 65-69 age group on Jan. 1, 1952.

The pension plan calls for a payment of \$40 a month to persons over 65 but under 70 who can qualify according to resident regulations and who can pass a medical test.

The cost of the pension would be shared by the federal and provincial governments, with the province covering the cost of administration.

Cancer Solution Claimed Near

WISCONSIN. — Louis Wiesner, French doctor, said Soviet research workers in the field of cancer treatment are "on the edge of a solution of the problem." Wiesner is one of 12 French doctors who have been on a three-week visit to health centers in Russia.

HUB BUILDING DESTROYED

PENTICTON, B.C. — A \$100,000 fire destroyed the hub building in this Okanagan valley city. The building housed a restaurant, taxi office, confectionery, bowling alleys and billiard parlor.

Think Right—Eat Right—Live Right

—By Les Carroll

SHOOTING IS BANNED ON MARKED HIGHWAYS

Opening of the game bird shooting season in Alberta this month is of special interest to members of the AMA, thousands of whom are keen hunters. In all sections of the province, they will be out taking full advantage of the season's thrills.

The AMA is anxious at all times to co-operate with those who are charged with the enforcement of the provincial regulations. This they have demonstrated many times.

Special attention is drawn to section 10 of the Game Act, 1946, which follows:

Sec. 10. No person shall at any time carry a loaded air gun, shot gun, or rifle in or on or discharge the same from an aeroplane or a sail boat or a boat propelled by steam, gasoline, electric or other motor power, or from a horse, carriage, rig, wagon, car, sleigh, hay rack, bicycle, automobile or other vehicle, provided, however, that nothing in this section shall apply to the hunting of coyotes or wolves.

2. No person shall discharge an air gun, shot gun, rifle or other firearm of any description along or across any main or secondary highway within the meaning of the Public Highway Act, whether any such highway is a hard surfaced, gravelled or dirt highway.

Motorists, particularly are interested in clause 2 which bans shooting "along or across any main or secondary highway . . ."

Last year, a number of hunters were prosecuted on charges of hunting on main or secondary highways. Fines were imposed and guns seized though it is understood that later in some cases the guns were returned to their owners.

One question which arises is whether these alleged offences occurred on secondary highways or on district roads. At the same time there is no disposition to condone reckless shooting on any road, secondary or otherwise.

To clarify the situation, this paper has been asked to publish a list of the main and secondary highways in the central and northern districts which run through districts popular among hunters for shooting of prairie chicken, partridge and Hungarian Partridge.

An official of the provincial department of public works states that all main highways and secondary highways in the province are numbered and marked.

A list supplied by the dept. shows there are 3,190 miles of main and 1,881 miles of secondary highways, making a total of 5,071 miles.

Here are some of the main highways: No. 12, Camper to Lacombe; No. 13, Hayter to Wetaskiwin; No. 14, Saskatchewan boundary to Edmonton; No. 15, Edmonton to Mundare; No. 16, Lloydminster to Jasper; No. 28, Edmonton to Namao.

No. 34, Triangle in Peace River country, to junction with No. 2; No. 36, Viking to Hanna; No. 37, Namao to Coronado.

The secondary highways include No. 12, Lacombe to Norbuck; No.

Quota Not to Bar Shipments In 1951 Contest

Contestants in the 1951 National Barley Contest need have no difficulty in shipping carload lots of malting barley in addition to whatever quota is in effect at their shipping point.

"Effective immediately" states a Wheat Board directive issued Aug. 13, "a producer may deliver, outside of the quota currently in effect at his delivery point, one carload of malting barley, a sample of which has been accepted by maltsters or shippers and upon which a premium is to be paid. This instruction will apply at all points in the designated area.

"Malting barley delivered in accordance with this instruction must be entered in the proper permit book with the notation 'Malting Barley' and deliveries must be made at the delivery point specified in the producer's permit book."

The procedure under this directive is as follows:

If you are shipping through an elevator, have your agent submit a sample to the malting companies or exporters. If they will accept the grain then get a special bin for your barley and have the agent obtain a car for you. Load it and bill it out in the regular way.

If you are shipping over the platform, first submit your sample. If it is approved then order the car through your nearest railway agent. Load the car and bill it out in the regular way.

URGES WAR AGAINST RATS

Relentless warfare against rats—mankind's greatest enemy in the animal world—is urged in a recent bulletin of Line Elevators Farm Service, written by D. M. McLean. A single rat, he points out, can eat or spoil over 100 lbs. of grain in a year, besides becoming parent or grandparent to hundreds of other rats. He recommends the new rat poison "War-farin", since this poison has no objectionable odor or taste, and since rats die slowly, without violent reaction or pain, "bait shyness" is overcome. It has a low potential hazard to other animals. (Alberta is threatened with rat invasion from Saskatchewan.)

18, Clyde Corner to Fort Assiniboine; No. 19, Westaskiwin to Norbuck; No. 20, Bentley to Sylvan Lake; No. 28, Namao to Cold Lake; No. 29, Jasper highway to Edmonton Beach; No. 30, Jasper highway to Wabamun; No. 31, Jasper highway to Seba Beach; No. 32, Fulstow Siding to McLeod river. No. 33, junction No. 43 highway to Alberta Beach; No. 35, Grimshaw to Great Slave Lake; No. 38, Edmonton Country Club Road; No. 39, Leduc to Norbuck; No. 41, Wainwright to junction with highway 28; No. 43, Carvel Corner to Valleyview; No. 44, Westlock to Smith; No. 45, Bruderheim to Myrnam; No. 46, Radway to Lac La Biche; No. 47, Bickerdike to Mountain Park; No. 47A, Leyland to Luscar; No. 47B, Coalspur to Foot-hills; No. 49, Donnelly to Belloy; No. 50, Tees to Mirror; No. 51, Bentley to Gilby West.

Oil Making Alberta Only Debt-Free Province

Discoveries of oil in Alberta since 1947 have greatly contributed to national prosperity and have brought about the possibility that Alberta may in the future be Canada's only debt-free province. W. G. Charlton, assistant to the manager of the western producing division of Imperial Oil Limited, told delegates to the national convention of Canadian Institute of Sanitary Inspectors Thursday in Edmonton.

In 1946 Canadian oil consumption was rising while production was declining. Turner Valley being the only major field in Canada, he said. The drain of American dollars for oil imports was causing considerable economic difficulties and many oil companies were giving up the search for oil.

The 1947 discovery at Leduc and subsequent discoveries in other areas, has completely changed the picture, Mr. Charlton said. The interest of the oil companies has been revived to such an extent that there are now about 160 companies operating in western Canada.

Further oil discoveries are expected, and there is a definite possibility that Canada will become self-sufficient in oil, the speaker stated.

PRESENT TOBACCO TAX—Excise and Sales

Cigarettes:

Per 1,000 cigarettes the consumer price is \$20.00 and the tax \$12.54.

Per 20 cigarettes the consumer price is \$0.40 and the tax \$0.25.

Total tax equals 63% of consumer price.

Tobacco:

Per 1 lb. package the consumer price is \$3.20 and the tax \$1.31.

Per 2 oz. package the consumer price is \$0.40 and the tax \$0.164.

Total tax equals 41% of consumer price.

Cigars:

Per 1,000 cigars the consumer price is \$110.00 and the tax \$23.79.

Per pkg. of 5 cigars the consumer price is \$0.55 and the tax \$0.12.

Total tax equals 21.6% of consumer price.

2. FEDERAL GOVERNMENT

Receipts from Excise Duty, Excise Tax and Sales Tax for the Year 1950.

Cigarettes—\$185,511,21.00 (71 % of gross sales value).

Tobacco — \$23,742,119.00 (45% of gross sales value).

Cigars—\$3,996,475.00 (25.6% of gross sales value).

Total—\$213,250,515.00.

STRAYED—onto my place, 3 wks. ago, light bay bred saddle horse. Please remove and pay expenses.—E. Larson, Viking. 28p

RECORD BARLEY CROP FORECAST

The Alberta Wheat Pool estimates Alberta's barley crop at 108 million bushels, as compared to last year's crop of 56 million, and the previous record of 75 million harvested in 1942. The average yield this year is expected to be 35.9 bushels per acre, somewhat less than the 39 bushels realized in 1942. Acreage planted to barley this year is the largest on record, totalling 3,011,000 acres, compared with the previous high of 2,534,000 planted in 1950.

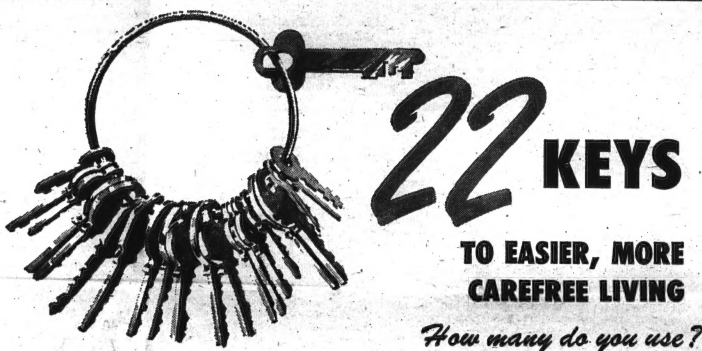

Danish Volunteers Build New School for Greece

The Greek village of Aganadero had no school. As in many other places its schoolhouse was destroyed during the war. Today, thanks to the contributions of Danish school children and of a team of Danish workers, a new schoolhouse is beginning to rise in the war ravaged Greek town.

The initiative was taken by the Danish Society for Reconstruction in War-Ravaged Countries and the Danish National Commission for Unesco. Members of the Danish voluntary team cut stone and mix batches of mortar for the brand-new school which is expected to open some time this summer.

How many do you use?

You have 22 key services at Canada's First Bank.

Some are personal, some are strictly business services . . . all are designed to smooth your way in money matters. Some you'll be glad to use often . . . others will be needed only now and then. Every one of them is doing a key job for thousands of Canadians . . . To get the most out of your banking business, it will pay you to get acquainted with them all.

HERE'S THE BOOKLET THAT TELLS YOU ALMOST ALL . . .

For a quick line-up, get a free copy of "21 Ways a Million Canadians Use the BofM" . . . to save money, to borrow money, to send money away . . . to pay bills by cheque . . . to bank by mail . . . to operate a joint account . . . to safeguard valuables . . . to take care of travel financing . . . to buy and sell securities . . . to handle every banking requirement of farming, commerce and industry.

Ask for your copy of "21 Ways . . ." at your neighborhood branch of "MY BANK".

THE 22ND KEY

Newest BofM key service is the modern method of money-management—Personal Planning. Already many Personal Planners are saving more money, despite today's high prices. Get your dollars out of the doldrums with Personal Planning.

Indians from Alberta May Join U.K. Circus

LONDON — The possibility of bringing a miniature Canadian Indian Village—complete with natives—to England is being explored by Billy Smart's circus, one of the United Kingdom's largest.

Ronnie Smart, now managing the travelling British "big-top" now in Leeds ("4,000 people, 70 horses, eight elephants," said he has made preliminary inquiries at Calgary. He plans to visit North America in November to interview department of Indian affairs officials at Ottawa if necessary. He hopes to bring 10 to 12 Indians in family groups, including some papooses, and to have them in a village, a miniature of that set-up every year on the Calgary Stampede grounds.

Smart said he thinks it would be an educational feature and mentioned the interest of British children in such Canadians and Americans as cowboys and Redskins. It is his tentative plan to have the Indians stay here for 3 years, as the circus travels a different circuit each year. The Canadian natives would be paid as performers, live in trailers rather than in their tepees, and wear Indian dress.

He hopes to make arrangements this fall and to have the Indians in Britain ready to start the new season which begins about Easter.

Coarse Grain Controls Repealed by Alberta

EDMONTON, Sept. 16—Alberta Saturday threw out legislation which had been designed to prevent farmers from selling their coarse grains to flour, feed and seed cleaning mills.

Agriculture Minister David Ure said the validity of the legislation had been questioned and Alberta was "doubtful of its authority to enforce" it.

Alberta passed the legislation at the request of producer organizations last spring as an amendment to the Coarse Grains Marketing Control Act. The purpose was to channel all coarse grain sales, other than farm-to-farm transactions, through the Canadian Wheat Bd.

Ure said, "It is argued that flour, feed and seed cleaning mills come entirely under Federal control and the province has no authority to pass legislation which restricts or controls their operations."

Ure also said "The question of whether the province has the power to pass the original control act is still one that is being considered." He added that "It is possible the court may be asked to determine whether this authority rests with the provincial or Federal governments."

In most cases a want ad in this paper brings good results. If you have something to trade, sell or barter, lost or found, the want ads do big work at little cost.

Will Adopt Reflector Car Plates Next Year

Alberta car owners will have "luminous" licence plates in 1952, according to a recent announcement by the provincial government.

The announcement is of interest to all motorists, indicating that a major step will be taken in the interests of highway safety.

Officials of the AMA, one of the principal advocates of safe driving, have indicated their interest in this new plan for this province. They have expressed high hopes that it will have the effect of reducing accident and also will aid in apprehending those who are prone to violate traffic laws by reckless driving or other willful actions that create traffic hazards.

While it is the intention to use a "luminous" or shiny plate which will reflect at night, the provincial authorities will stay with the present two-plate system for cars. Some provinces have decided to revert to the single plate plan.

The luminous plate has been tried out in some states with gratifying results, it is claimed.

INTEREST-ING!

(Bank of Montreal Magazine)
Mary had a little cash,
She kept it in her hose;
And everywhere that Mary went
Her friends all said "It shows!"
So Mary took it to the bank
And there she wisely hid it;
Which brought her far more interest—
Or did it?

WARNING TO HUNTERS

Hunters taking to the lakes and sloughs in light craft this duck-hunting season are warned by R. R. Bishop, Red Cross swimming and water safety director, that tragedy too often follows duck hunting trips.

Hunters with layers of bulky clothing and heavy boots overload their boats with friends, guns and ammunition with no thought of water safety.

The first principle in protection is not to overload the boat. Should the boat tip over, stay with it. It can be and is, the best life-preserver the hunter has. Secondly, the hunter who braves deep water should wear an inflatable safety vest over his clothing.

Heavy boots should be loosened so that if the hunter lands in the water, they can be removed easily.

An extra oar or paddle in the boat has saved many hunters. Finally, every hunter can make an economical life-preserver for himself by obtaining two buckets with sturdy handles and tightly fitting lids. The buckets, used as buoys, will keep the hunter's head above water.

A Power in the Lodge

Boss: "Rufe, did you go to your lodge meeting last night?"
Rufus: "Nah suh. We dun have to pospone it."
Boss: "How was that?"
Rufus: "De Grand All-Powerful Invincible Most Supreme Unconquerable Potentate dun got beat by his wife."

Crows Must Read, Says Farm Expert

PLYMOUTH, N.C. — Do crows read newspapers? W. V. Hays, Washington county farm agent for the state college extension service, thinks perhaps they do.

Hays says the county wildlife club recently arranged a "crow shoot" for one afternoon at 5 p.m. when the crows came in to roost—or were supposed to. The event, based on a successful shoot held last year, was well publicized in the local paper.

"The crows," says the county agent, "must have read the paper, since only one crow made his appearance. It is thought he was just passing through—which he did in a hurry."

FARM STORAGE

Grain storage is going to be a very serious problem this season. Elevator capacity will be filled soon after harvesting gets into full swing. A large percentage of this year's crop will have to be stored on the farm.

Probably the cheapest farm storage can be provided by snow fencing fastened securely in a circular position. Straw should be placed on the bottom of the enclosure and up the side. Grain can then be safely stored therein. The top should be in the form of a cone and straw or some shavings placed thereon.—Wheat Pool Budget.

ALTA. BREEDER PAYS \$10,000 FOR HEIFER

An Aberdeen-Angus heifer Tolan Blackcap Missie was purchased at the recent J. Garrett Tolan sale at Pleasant Plains, Illinois, by the prominent Angus breeder, Sam Henderson of Lacombe for \$10,000. The heifer is only 13 months old and is regarded as the highest priced heifer of the beef breeds that has ever entered the province. At the same sale, a bull Tolan Brandoir, a half-brother to this heifer, sold for a record figure of \$55,000 to Highlands Farm.

Monday, October 8, has been designated as Canada's Thanksgiving Day. As it is a national holiday all stores and business places will be closed all day.

The LETTER BOX

Re Power Failures

Camrose, Alberta,
September 21, 1951.

Dear Editor: The purpose of this letter is to attempt to explain to our customers the reason for the interruptions of service they have received this summer, and also to thank them for their patient and sympathetic attitude towards our employers during the terrible storms, when many of our men worked day and night with practically no rest. Any complaints we received were nearly always presented in a kind and friendly manner which helped more than can be imagined.

During the last few years there has been an unusual demand for electric service, and as a result, our lines and sub-stations became overloaded. This necessitated the building of new ones and rebuilding others, and to do this we often had to take miles of lines out of service and try to feed from another source. All this had to be done with a scarcity of skilled help. Then came the storms which not only damaged scores of transformers, but shattered and blew down poles, and then rain made roads almost impassable for our crews to restore service. On more than one occasion this happened while auxiliary generating plants were undergoing repairs, making it impossible to re-route service from another source.

But—thanks to a loyal, hard-working and capable staff—we are gradually getting work done, and we sincerely hope the worst of it is over.

We know this explanation does not help you farmers milk the cows, neither does it assist you storekeepers retrieve lost business, nor does it assist you housewives with the washing, but we hope it does convey to you some of the problems we have to meet in trying to give you service. And believe us when we say we want to give you good service, for it is to our mutual benefit to do so.

Sincerely yours,
Calgary Power Ltd.
(per) T. E. Tanner,
Divisional Supervisor.

Canadians Sail 500 Miles Across England

Rev. Father J. E. McGrane, Parish Priest of Lac La Biche, Alta., and his crew of four sea cadets last week sailed their home-made 32 ft launch 500 miles across England. The teen-aged crew travelled through hundreds of locks from Liverpool to Manchester, Birmingham, Nottingham, Leeds, down the Grand Union Canal to the Thames at Brantford and on to London.

Boy 6, Killed Under Tractor

VULCAN, Sept. 16—A 6-year-old Wayne Merle Smith was killed on Saturday when he fell under a tractor near his father's farm four miles west of Vulcan.

The boy was sitting on the tractor with the driver when the accident occurred. The machine struck a bump and he was thrown under a wheel.

A nation can be no better than its people. People can be no better than what they believe in—the things they are taught.

Teachers are among the most important members of your community.

Wants Nothing "Second Rate" About Canada's Armed Forces

CAMP BORDEN, Ont.—Defence Minister Claxton told a group of officers-in-training that Canada wants nothing "second rate" about her armed forces and that she will continue to set her sights high to get the best officers available. "During the last four years I have emphasized officer training to the point of meeting criticism on the score that our standards were too high," Mr. Claxton said in a speech prepared for delivery.

But this emphasis, he added, has been justified by the "fine record of the troops in Korea, and in all the various exercises, as well as by the job that has been done in expanding the forces by more than 75 per cent during the last 12 months."

Mr. Claxton spoke before more than 50 officers-in-training, completing their first eight weeks of training under the new direct entry plan. They now will be split among various corps units to get more practice in leadership.

Detailing the picture on army officers, Mr. Claxton estimated that Canada has about 26,292, with 10,

322 on active service, 8,648 in reserve units and 7,321 as candidates in training.

In addition, there were some 57,000 veteran officers with service in the Second World War, enough to give Canada a good start in the event of all-out war in the next two or three years. But still more were needed "so as to ensure at any time adequate numbers to meet any need."

However, quality had to be kept in mind. The only thing more expensive than education was ignorance.

"We want to have nothing second rate about our armed forces... the quality of the generals of the future, the success or failure of our arms depends on the quality of you young men I see before me, on what you do, on the training that you receive here and in the services afterwards."

Mr. Claxton noted that part of the group were French-speaking Canadians. He hoped the comradeship established between the English and French-speaking groups "will persist and grow throughout your service careers."

"The increasing understanding and unity of purpose between French and English-speaking Canadians everywhere should find their highest expression in our country's armed services."

Human Guinea Pig Resists All Cold Germ Inoculations

LONDON.—Scientists seeking the elusive cure for a common cold have run into an unexpected snag. They have discovered a human "guinea pig," a woman who can't even be given the sniffles, let alone an experimental cough or cold.

The test tube patient is Mrs. Kathleen Chaffey, 45-year-old housewife of London's suburban Ealing. Doctors attached to the research unit at Salisbury in Wiltshire, where colds are artificially induced, are puzzled by the woman's strange resistance to germ inoculations.

She goes there for 10 days every three months to be infected but while other volunteers sit around all choked up, with eyes streaming to the accompaniment of a sniffling chorus, Mrs. Chaffey just relaxes and offers unappreciated sympathy.

"When I had been three times without catching a cold I suggested to the doctors that I was just wasting their time," she said. "However, they asked me to keep going, apparently under the impression they can learn something from me."

A former nurse, Mrs. Chaffey has not succeeded, in passing, on the secret of immunity to her husband. He catches cold at the least provocation and suffers from chronic hay fever as well.

BEFORE AND AFTER IN BRITISH FIGHTERS—One of the first of officially approved photographs of the new British fighter, the supermarine "Swift," with Rolls Royce Avon jet engine, shows it flying above, in formation with a forerunner in the Royal Air Force, a supermarine "Spitfire". The "Swift" will be the first of the new swept-wing fighters to go into quantity production for service in the Royal Air Force.

Will Co-Operate To Put Down Head-Hunting

BOMBAY.—The Bong of Wong has promised Indian authorities that he will co-operate in trying to put down head-hunting by his tribesmen on the Indo-Burma frontier.

The Bong of Wong is the leading chieftain of the Naga tribe, and he made news during the Second World War when he officially declared war on the Axis powers.

His tribesmen, living in the hills between the Chin and Brahmaputra rivers, were officially supposed to have given up head-hunting. But his tribal report evidently has not reached the remote villages in the massive frontier mountains. In the last 12 months Nagas from the backlands have taken 700 heads in tribal feuds and raids in villages.

Government troops are looking for the renegade warriors, and the Bong, who claims that most of the 75,000 Nagas are peace-loving, says he will co-operate.

PUMP UP PUNCTURED TIRES AS CAR TRAVELS

LONDON.—A miniature compression pump, which pumps air into punctured tires while an automobile is in motion is one of the exhibits at this year's London model engineering exhibition. The compressor can be fitted to most cars and has a patent universal joint which can be attached to the wheel with the flat tire.

"PEACE AT LAST"

TARLETON, Lancashire, Eng.—Rev. L. N. Forse doesn't approve of epitaphs like "peace at last." They might have a double meaning. "If the dead person was a naggar," said the parson, "the words could mean peace at last for the one left behind."

Small Diamonds In Great Demand

TORONTO.—Half of all engagement rings sold in 1950 contained diamonds weighing between one sixth and one-third of a carat, a recent survey shows. With smaller stones in demand, designers are reported to be using more of the precious white metal, palladium to enhance the diamond's brilliance, especially since the U.S. emergency ban on use of its sister metal, platinum.

IT'S A MAN'S WORLD EGYPTIAN GIRL FINDS

CAIRO, Egypt.—An Egyptian young woman married, in order, a laundryan, a laborer, a grocer and a motor mechanic, police said. They brought bigamy charges against Mounira Hassan Abou-Houn.

In this Islamic capital a man by law can have as many as four wives—but the female is restricted to one mate.

SNACK AT BEDTIME MAY BE AID TO SLEEP

Many persons wonder whether that snack before going to bed is a wise thing or not. Some believe a snack makes them go to sleep more easily. Others say it keeps them awake and causes digestive disturbances. The answer is obvious. . . . If one is hungry at bedtime, he should eat.

DATE AT A GLANCE

DES MOINES.—No matter which way he looks when he swings in his swivel chair, N. F. Reed, clerk of the U.S. district court, can tell the date at a glance. He has 17 calendars of all sizes on the walls of his office, in the federal building.

New Substance Treats Coronary Thrombosis

BASEL, Switzerland.—A new synthetic substance that may have value in treating coronary thrombosis has been discovered here. As yet, it has no name. It merely is known as No. 5198.

The substance has not been used in human cases, but it has brought significant results in animal experiments.

Scientists are keeping hearts of rabbits beating in an instrument at a laboratory here to test the effectiveness of 5198 in diffusing the coronary arteries.

The rabbit hearts are removed quickly and then hooked to an instrument that contains tubes and glass hose. A saline solution flows constantly through this apparatus and the heart and all its vessels, including the coronaries.

Sometimes, the heart may stop before the attachment is made but usually it can be started again through the use of powerful drugs.

The hearts can be kept beating for hours or days, depending on the length of the experiment.

While the heart beats the scientists can inject a substance known as barium chloride into the saline solution. The chemical causes a partial coronary occlusion and the heart almost stops.

Quickly then, the scientists inject the new synthetic drug known as 5198 into the saline solution.

Within a matter of seconds the coronaries are dilated and the normal flow of the saline solution is resumed.

Manitoba Elderly Couple Prepare Own Graves

WOODBURY, Man.—Two elderly residents of this village in western Manitoba who still enjoy good health have prepared their own graves.

They are William Leach, 86, and Mrs. Leach, 79. They recently completed cement vaults, side by side, in the village cemetery. The pits of the vaults now are covered with boards.

There is nothing elaborate about the vaults, but round white stones have been placed at intervals around the cement to aid to its appearance.

Behind the vaults is a tombstone to the memory of two sons, Herbert and Wilfred, who died in the First World War. They are buried in Europe. All the 11 other children of the Leachs are living and they have 53 grandchildren and 37 great-grandchildren.

When they celebrated their 63rd wedding anniversary last March they received congratulations from the King and Queen.

POULTRY FEED HOPPERS

When making poultry feed hoppers, ordering them from the poultry feed and equipment firm, remember they should come in three sizes to meet the needs of chicks, growing stock and adult birds. Experiments at the Experimental Station, Saskatchewan, B.C., show that they should be durable waste-proof and easy to clean.

Comforts Of Home Found In Trailers

(By J. Howard Story, in Steelways Magazine)

When the National Trailer Coach Show opened last Chicago's navy pier in 1947, hundreds of visitors removed their shoes, donned paper slippers and respectfully flipped past a sign which read in part: "Custom requires that shoes be removed before entering a house of worship or royal residence."

Beyond the sign stood the new mobile home of Emir Abdullah, King of Trans-Jordan, a 28-foot trailer with a Plexiglas shower stall, television, electric dishwasher, an air conditioning unit and a leopard skin chair.

Whatever caused Emir Abdullah to part with \$27,500 for his new home on wheels, he was probably influenced to some extent by the same reasoning that has sent some 2,000,000 American trailer devotees rolling down the highway in houses on wheels. For them the trailer is the answer to the age-old conflict between adventure and the home. Now you can take to the high road and keep your front porch with you. You can keep your canopied sundeck too, if you have one of the more recent luxury models.

The people who live in trailers vary as widely as those in any other cross section of the population. They are religious people who want to see the country, military families who find the shift from one assignment to another much easier to take in a trailer, people whose business (though they're not completely scrupulous) demands that they move often from one part of the country to another. They come from all backgrounds, age groups and financial strata.

Edward Wilson, managing director of the Trailer Coach Manufacturers' Association, says, "The big trend in trailers nowadays is for people to stay in one place longer before moving on." For the manufacturer that means building bigger, more comfortable coaches. Our figures show that 64 per cent of the coaches purchased in 1950 were over 27 feet long compared to only 37 per cent in 1949. In 1948 this percentage was 17. We don't produce nearly as many coaches under 20 feet.

Yesterday's bouncing, rattling wooden box of a trailer is as obsolete as the covered wagon. Thanks to modern engineering, imaginative design and steel, today's coach has more the appearance and livability of a private car on a crack trail.

More than 35,000 tons of steel went into the building of trailers last year, most of it for undercarriages and chassis frames, and in some models sides and roofs. Using welded steel construction a manufacturer can turn out a 28-foot coach with a chassis that weighs only 500 pounds. Steel has taken over most of the structural jobs that wood once did in trailers, a replacement that has paid off in strength, reliability and booming sales. Sheet steel is also used for the exterior walls of many trailer coaches.

The modern market for the trailer does not end with the soldier, the traveling salesman and the retired business man, for the house on wheels can serve equally as well as a mobile office, display room or hospital. The United States Public Health Service is now using blood laboratories on wheels equipped to make almost any desired test on the spot. But the trailer's main job probably will continue to be that of satisfying the need for comfortable mobile living. Meanwhile, trailers are becoming more and more luxurious. One has a special porch for pets; another has a trick second story that lowers hydraulically when you take to the road. But ardent trailerists hold asstance at these super highway yachts. Their inhabitants tend to settle down in trailer parks and never stir for a year or more, earning themselves the epithet of "squatters". As one disgruntled oldtimer put it, "You might as well live in a house."

B.C.M.P. DOG TRACES \$2,780 STOLEN MONEY

VANCOUVER.—It didn't take "Bugs" the famous R.C.M.P. dog long to discover a cash box with \$2,780.

He was called in after a store robbery at Crescent Beach, 30 miles south of here, and within two hours found the loot.

The box, which was taken from a store clerk, was cached in the woods. Bobby picked up the fresh trail of the robbers from the back door of the store.

GOOD RECIPE FOR KEEPING CHEERFUL

A well-known American author met an old man called Uncle Joe, who was always cheerful in spite of having had more than his share of life's troubles.

"How have you managed to retain your optimism and cheerfulness in spite of them all?" asked the author. "Well, I don't know, but I've learned to co-operate with de inevitable." — 3548

Map-Makers Busy Keeping Up With Changes

INDIANAPOLIS.—This hectic world has been changing so fast that map-makers here are busier than they have been for many years.

One of the leading map publishers in the United States, the George F. Cram company, has made at least 28 major changes in its world maps since the Second World War started, and the major peace treaties are still up in the air.

But Cram's map men don't sit around waiting for diplomats to draw new international boundaries in permanent, legal lines.

"When it becomes evident an occupation is going to stick, we go ahead with our changes," said E. A. Peterson, a map salesman who became president of the 94-year-old firm.

For instance, when Japan seized Manchuria in 1932, Cram's changed their maps to show it as Manchukuo, a Japanese satellite, without waiting for international confirmation.

The same maps long ago restored the name to Manchuria, showing it once more part of China. The map men similarly showed the terms of the Japanese surrender in 1945 so the maps would be up-to-date during the years of stalemate on a formal peace treaty.

Poland came out of the Second World War as "an awful headache" for the men who draw maps. They had to check the Potsdam agreement, a Russian-Polish treaty and official maps because most of its boundaries were revised.

International boundaries had been comparatively constant when the Second World War started. But as the conflict began to promise new boundary changes the map makers were dismayed by a slump in business.

To stimulate sales, Cram's sold globes with coupons, promising to send out patches for 10 cents to bring globes up to date after peace treaties set new boundaries.

Since the war, Cram's has received 50,000 coupons, but the diplomatic stalemates have turned their offer into a long-term agreement. As they promised, they'll wait for treaty-established boundary changes, so far as the globes are concerned.

Trap For Pigeons

Every week in the B.C.'s Pacific Service Sam Pollock gives a broadcast called "News from Home". In a recent edition he lightened the more serious political and economic news it contained by an account of the drastic steps now being taken by the Corporation of Leven, in Fifehire, to get rid of the two hundred-odd pigeons which roost in the Town Hall's clock-tower. So grave has the pigeon menace become that the Borough's official rat-catcher has been told to ignore his usual prey and concentrate on higher game. Every device he has employed so far has failed. In its object and now Scotland's most potent weapon is being brought up to deal with the situation. The rat-catcher has been issued with a dozen bottles of the best Scotch whisky with which to encompass the pigeon's downfall. Their food is to be soaked in this heady brew and when they are completely under its influence, their crops laden with whisky-soaked corn, it is expected that the intoxicated birds will be comparatively easy to catch. "If the ruse succeeds," said Pollock, "it will make an excellent parable on the fate that awaits those who fall too easily to the lure of liquor."

If we noticed little pleasures as we notice little pains, if we quite forgot our losses and remembered all our gains, if we looked for people's virtues and their faults refused to see what a comfortable, happy, cheerful place the world would be.

Fall Favorites For Afternoon, Evening Wear

Silk suits are destined to be popular all during the fall and winter months. This one, (left), of brown metal shot taffeta has large black velvet cuffs and jeweled buttons to make the rich fabric even more elegant. This taffeta theatre dress, (center), has a very full skirt and sleeves which are gathered from the shoulder. A full-length velvet coat lined with matching taffeta is worn with it. Favorite color of the designers of suits this fall is a brown and beige mixture. The small check of the suit, (right), is repeated in the larger pattern of the coat. Narrow bias bands outline the pockets. —Central Press Canadian Photo.

Should You Knit?

Wise Yarn Buyers will Pick Up These Big Values Fast

STANFIELD'S RED LABEL

Lovely soft yarn that makes wonderful socks, mitts, scarves, sweaters. Green heather, brown heather, blue heather, grey and buff. Big Value.

89c

Entertainment at its Best

That's what you get when you own an RCA Victor Radio, "the Speaker with the Golden Throat," the reception and clearness is wonderful. If you have an old radio you will appreciate the wonderful tone in a New Victor priced from \$27.95 up, now on display at your favorite hardware store. Call in, see and hear them today.

The next thing to Electric Light on the farm is a Coleman Gas Lamp, and the most appreciated appliance is a "Servel Kerosene Refrigerator" which we now have on display.

CANADIAN NATIONAL

Stock is Lost in Daysland Fire

DAYSLAND—Fire of unknown origin destroyed the barn on the farm of Mr. and Mrs. Peter Lindabell.

Fifteen calves, two horses and several pigs were burned to death along with the feed grinder and milking machine.

Mr. and Mrs. Lindabell were in town at the time of the blaze.

Sutherland—that the pay sheets be passed and paid when signed by the Councillor concerned. Cd. Belanger—Adjourn. Cd.

CANADA SENDS GOOD WISHES

OTTAWA—Prime Minister St. Laurent has sent this message to the King:

"On behalf of the government and the people of Canada, I send respectful good wishes for the early and speedy recovery of Your Majesty's health."
